To the Chairman and Members of the Mirfield Urban District Council.

I have pleasure in submitting my Annual Report relating to the Urban District of Mirfield for the year 1966, and have, as usual, included information about the Health Services provided by the West Riding County Council within the district. Mirfield, together with the adjoining Borough of Spenborough comprise one Health Division within the County Council scheme of Divisional administration.

Comment has been made where appropriate on the statistical sections of the Report, but the following general remarks may be of interest. The Registrar General's mid-year estimate of the population is 14,510, an increase of 460 since last year. Within this figure there was a natural increase of 96, being the excess of the number of births over the deaths. The estimated number of dwellinghouses at the year end was 5,350—an increase of 211 over last year, and it will be seen that the trend of recent years has continued with considerable house building in the private sector and substantial numbers of persons moving into the district from nearby industrial areas.

The vital statistics were, in general, satisfactory, the birth rate (19.9) in particular being well above the national average of 17.7. The death rate unfortunately is also higher, 13.3 compared with 11.7, but is comparable with rates for other urban districts.

The incidence of notifiable infectious disease was very slight, though measles was prevalent in small numbers in all parts of Mirfield throughout the year.

The various immunisation procedures again showed good acceptance rates and it can be stated with some confidence that well over 90% of all the children have received protection against Diphtheria, Whooping Cough, Tetanus and Poliomyelitis shortly after attaining their first birthday. Vaccination against Smallpox, which takes place at eighteen months of age, is accepted with less enthusiasm and the numbers of young children protected are probably more in the region of 50-60%. Similar remarks apply to Tuberculin Testing and B.C.G. Vaccination among thirteen year old school children and those of school leaving age, as is shown in the section of the Report dealing with the school health services.

The clinic services, child welfare, child guidance, chiropody and cervical cytology (since November) continue to be well patronised and the domiciliary services such as health visiting, home nursing, midwifery and mental welfare, home helps and aged persons chiropody, seem to show an increased case load each year. It is beyond dispute that all, in their own way, have become indispensible to modern community living as part of the National Health Service. The closer involvement of health visitors and district nurses with general practice is developing in a satisfactory manner.

The aged persons wardens service which is administered by the District Council with grants from the County Council has also proved its value over the past few years, has expanded again this year with the appointment of two additional wardens, and is also certain to extend further as time goes by.

It is my belief that the social and other services for aged persons in Mirfield, in which the District Council, the County Council and the Voluntary Agencies co-operate, are comprehensive and effective. In the nature of things they will expand or alter as further needs become evident, but at the moment the most serious deficiences for the best care of the aged are in the provision of hospital beds for the aged and chronic sick and also to some extent in the provision of special housing accommodation adapted to the needs of the elderly.

The section of the Report dealing with the environmental health services is largely comprised of statistics relating to the very many activities of great importance in the preservation of health and the improvement of amenity which have become routine duties of the Health Department. Steady progress continues to be made in the abatement of atmospheric pollution with the completion of the No. 7 (Lee Green and Greenside) Area and the submission of the No. 8 (Towngate) Area for confirmation. The statistical progress report which shows that 1,763 premises have been included in Smoke Control Areas is misleading since many of the new houses built in the area during the past seven or eight years, which number nearly 1,500, were erected in previously confirmed areas, so it is probable that almost 50% of the premises in Mirfield are now located in Smoke Control Areas.

There was little slum clearance activity during the year as the Council's housing resources in the shape of re-lets of existing property and the sixteen new flats at Old Bank Road were required for the rehousing of persons from property represented in the previous year. The problem of slum clearance is not, however, one of large proportions as the best available estimate is of 150—200 houses requiring to be dealt with in the next 10—15 years. There is no doubt that the steady improvement of property by the use of the Improvement Grant Scheme has done much to improve the general standard of housing in Mirfield, and a further 34 grants were made during the year.

Still, in spite of our progress and environmental amenity of living in Mirfield, it would be wrong to be complacent. It is, I believe, beyond doubt that the health of the community would benefit both immediately and in the long term if all the unfit houses could be demolished, if the whole area could be made smokeless, if the water supply contained added fluoride to prevent dental decay and if only people would refrain from smoking tobacco. These are, of course, only a few matters involved in producing health or preventing disease, but they are very important.

As a general comment on administration of the National Health Service, I remain firmly convinced that integration of the Hospital, Public Health and General Practitioner services within a single administration would not only rationalise but also greatly improve its efficiency. This appears to me to be particularly evident in the matters of mental health, midwifery, geriatrics and the effective use of hospital accommodation. Co-operation in these, as in all other matters locally, is very good indeed, but its achievement can be time consuming, and it would be surprising if there was not at times a lack of balance in the overall plan of development.

Once again I am greatly indebted to Mr. Johnson, the Chief Public Health Inspector, as to all members of the Divisional Health Department for unfailing help and support. In conclusion may I express my appreciation of the courtesy extended to me by the Chairman and members of the Mirfield Health Committee throughout the year.

WILLIAM MASON DOUGLAS,

Medical Officer of Health and Divisional Medical Officer.

POPULATION AND SOCIAL CONDITIONS.

The population (provisional) of the Urban District of Mirfield at the 1961 Census was 12,294 an increase of 409 since the 1951 Census. The Registrar General's estimate of the population for the year 1966 is 14,510, and this figure is used throughout this report in calculating rates.

There are a number of important industries established in the district including woollen and cotton mills, maltsters, card makers, soap manufacturers and building contractors. The District, however, cannot be said to be heavily industrialised, and there is ample open space and fine residential localities.

I am indebted to the Dewsbury Employment Exchange for the following information regarding employment in the District:—

Throughout 1966 the unemployment situation in Mirfield has remained satisfactory with the number of unemployed at a very low figure. In January, 1966, the percentage was approximately $0\cdot2\%$ of the working population, this has slowly increased to 0.5% in December, 1966. This compares with $1\cdot4\%$ for the immediate area as a whole, $1\cdot8\%$ for the Yorkshire and Humberside Region and $2\cdot4\%$ for Great Britain.

There has been very little change in the industrial content of the area. The main employment opportunities being in the Textile Industry.

Infant Mortality Rate per 1,000 live births: 17.3.

Neo-natal Mortality Rate per 1,000 live births: 13.8.

The birth rate at 20.7 (corrected) per 1,000 population is higher than last year (19.2) and compares favourably with that for the administrative county and the country as a whole. The number of births exceeded the number of deaths by 96. Of the 295 births only 31 were born at home, the remainder, almost 90% of the total, being born in neighbouring hospitals or the general practitioner maternity home at Crossley.

Totals	18	18	16	16				

IMMUNISATION AND VACCINATION.

Community immunisation in this country is at present directed to the prevention of diphtheria, whooping cough, tetanus, poliomyelitis, smallpox and tuberculosis. These procedures, with the exeption of vaccination against tuberculosis, can be administered either through the public health clinic services or by family doctors. A vaccine giving substantial protection against measles has now been developed but this may only be administered under the National Health Service by family doctors and is not required to be registered with the Local Health Authority. The following tables show the amount of immunisation accomplished in the Mirfield area during the year under review:—

Diphtheria Immunisation.

		Y	Others under				
	1966	1965	1964	1963	1959-62		Total
Completed Primary Course	128	111	9	1			249
Re-inforcing doses		_	2		164	1	167

I give below a table showing the numbers and estimated percentages of children who have had a course of immunisation within the last five years separated from those who had a course of immunisation previously:—

Age at 31-12-66	Under 1 1966	1—4 1965–1962	5—9 1961–1957	10—14 195619 5 2	Under 15 Total
Last complete course of injections (whether primary or booster) A. 1960-1964	128 (45%)	913 (95 %)	773 (71 %)	524 (57 %)	2338 (76 %)
B. 1959 or earlier			310 (29 %)	385 (42 %)	695 (22 %)

Whooping Cough Immunisation.

The following table shows the number of children who completed a primary course of pertussis vaccine (singly or in combination) in Mirfield during the year ended 31st December, 1966:—

Year of Birth	Number of Children
1966	128
1965	109
1964	9
1963	1
1959-62	
	Total 247
	10tal 241

Whooping Cough Immunisation in relation to Child Population.

Number of children at 31st December who had completed a course of immunisation at any time before that date.

Age at 31/12/66 i.e. Born in year	Under 1	1—4	5—9	10—14	Under 15
	1966	1965-1962	1961-1957	1956-1952	Total
Number immunised	128	890	752	562	2332

Approximately 45% of children under one year and 89% of children between one and four years of age had received protective inoculation at the year end.

Smallpox Vaccination.

Table showing Persons Vaccinated and Re-vaccinated during 1966.

Age at date of vaccination	0-3 mths.	3-6 mths.	6–9 mths.	9–12 mths.	1	2-4	5–15	Total
No. Vaccinated	1	3	2	_	122	30	10	167
No. Re-Vaccinated	_	_		_			2	2

Poliomyelitis Vaccination.

The oral method of vaccination against poliomyelitis using the Sabin vaccine is now the only method adopted in this Division. This is easy and convenient to use, and causes no upsets whatever.

The following table gives details of poliomyelitis vaccination carried out during the year in Mirfield:—

		Y	ear of I	Birth		Others under	
	1966	1965	1964	1963	1959-62	Age 16	Total

Re-inforcing doses			2		165	2	169

Vaccination Against Tuberculosis.

Vaccination against tuberculosis is available to certain contacts of cases of tuberculosis, especially young infants, and also to school-children of 13 years of age. The former are carried out by the Chest Physician at the general hospitals, and the details of our school programme are given in the section relating to School Health for the sake of convenience.

MENTAL HEALTH SERVICE.

Two full time Mental Welfare Officers are employed within the Divisional area. Their duties are to provide supervision and guidance to persons who have become mentally ill or require after-care following treatment, in co-operation with general practitioners and the consultant staff of psychiatric hospitals. This is time consuming and difficult work including as it does arrangements for admission to hospitals, rehabilitation, supportive advice to patients and families, social problems of patients and the like.

Excellent relationships and co-operation have been established locally with all those involved in the work of mental illness, and I am especially grateful for the interest shown by Dr. Wilkinson, the Consultant Psychiatrist, in the Contact Club for patients which is held at the Health Centre, Cleckheaton.

Periodic visits are also made to the homes of sub-normal persons and constant liaison is maintained with the staffs of the Junior and Adult Training Centres at Heckmondwike, Ossett and West Ardsley which receive patients from this Division.

HOME NURSING SERVICE.

With the attachment of district nurses to individual medical practises rather than allocating work on an area basis it has become increasingly difficult to maintain separate records for each of the two local authorities which comprise the Division. The following figures, therefore, relate to the whole Division and not to Mirfield alone:

Classification	No. of cases attended by Home Nurses during the year	No. of visits paid by Home Nurses during the year
Medical	779	19,652
Surgical	238	4,149
Infectious Diseases	6	11
Tuberculosis	2	108
Maternal Complications	4	39
Other	9	87
TOTALS	1,038	24,046
Patients visited above who were aged 65 or over at the time of the first visit during the year	585	17,274
Children vistited above who were under 5 years of age at the time of the first visit during the year	30	195
Patients included above who have had more than 24 visits during the year	270	16,917

DOMICILIARY MIDWIFERY AND ANTE-NATAL CLINICS.

The domiciliary midwifery staff in the Division was further reduced this year on the resignation of Nurse Roberts in May and arrangements had to be made with the neighbouring Division of Batley for assistance from their midwifery staff when required, until the appointment of a new midwife in August. The staff now consists of three full-time midwives and while this establishment is sufficient to carry out the work there are considerable difficulties during sickness, holiday periods and the like. There were 23 fewer home confinements in the Divisional area this year, but early discharges from hospitals and maternity homes, where home conditions were suitable, continue to impose a considerable amount of post natal visiting on the midwives. The following midwifery figures relate to the Divisional area:—

As the number of women attending the Ante-Natal Clinic continue to decline, increasing emphasis is given to the Relaxation and Preparation for Motherhood classes which are held at the Cleckheaton Health Centre and Ings Grove Clinic, Mirfield. These are now well established and very popular largely due to the many General Practitioners who recommend their patients to attend them.

HEALTH VISITING AND CHILD WELFARE.

The system of attachment of individual health visitors to individual medical practices or groups of practices, rather than allocating work on an area basis, has presented no problems other than the additional amount of travelling involved. This is compensated for by the much closer working relationship between the general practitioners and the nurses concerned, which is of considerable benefit to the members of the public who require their services.

Because of this attachment, which involves working in both the local government areas which comprise the Division, it has become almost impossible to separate the records for each area. The following, therefore, are Divisional figures:—

Number of visits paid by health visitors during year:—

Tiui	inder of visits pard by mearth vis	itors at	iring yea	LI.

NURSERIES AND CHILD MINDERS REGULATIONS ACT, 1948.

Under this Act the County Council is authorised to grant or request registration of both Nurseries and Child Minders. There have been few enquiries for registration over the years but recently interest in this aspect of child care has increased. At the end of the year two persons in Mirfield were registered under the Act authorised to care for a total of 13 children. These Child Minders are regularly visited by the Health Visitors to ensure that the standards required are maintained. There are no private Nurseries registered under the Act.

CHIROPODY SERVICE.

The chiropody service for elderly and handicapped people continued to operate successfully during the year and there were no undue delays in instituting or continuing treatment. The number of persons receiving clinic treatment again increased and there was also an increased demand for treatment in their own homes by people unable to attend the clinics by reason of old age or infirmity. Additional sessions were arranged to cope with the increased demand. No special problems presented themselves and the service is considered to be adequate for the needs of the area.

OLD PEOPLE'S WARDEN SCHEME.

During the year the Old People's Wardens Scheme was extended to cover groups of elderly persons living in private houses in the Battyeford and Eastthorpe Wards. The friendly visiting, supervision and neighbourly help which they afford is of great comfort and support to those who receive it, and the link between the Wardens and other members of the Health Department staff ensure that the needs of the elderly are reported and dealt with expeditiously.

Estate	Visits during year	Average Number of Cases Supervised

- (b) Warden commenced 11.7.66.

HOME HELP SERVICE.

The demand for this service increases year by year, and we have been fortunate in that by and large we have always been able to meet these demands. There is always a considerable turnover in the home help staff and we have not always been able to recruit as many home helps as we would have liked. New applicants, however, do not have to wait for assistance, but receive help at once by making slight reductions in the service given to others. The majority of patients receive a minimal amount of help—the average seems to be two half-days a week—and if it were possible to recruit more suitable staff, extra help could be given to undertake some of those household tasks which need to be done periodically in a house, but which are at present left because of the necessity to deal with the weekly tasks. As usual the figures given below reveal the benefit which the aged and chronic sick receive from the service.

Reason for Provision	No. of Cases	Hours worked	Percentages
Maternity Aged Chronic Sick	7	326	1.5
Over 6 5	146	20,992	$97 \cdot 0$
Under 6 5	3	117	0.5
Others	4	206	1.0
Totals	160	21,641	100 · 0

PROBLEM FAMILIES.

Within most communities there are a number of families who present special problems which fall to the lot of social workers over a wide sphere of activity to deal with. Occasionally, and often tragically, circumstances lead to the break-up of families, and young children being taken into permanent care by the Children's Authorities. Usually with this type of family a number of social agencies are involved and for this reason periodic meetings are convened to share information, concert action, avoid overlapping or conflicting advice, and to strive to the utmost of endeavour to prevent family break-up, consistent of course with the physical and mental well-being of the children.

In the West Riding responsibility for the conduct of these meetings devolves upon the Divisional Medical Officer. Seven full meetings of the Co-ordinating Committee were held during the year at times when it was felt that the circumstances of a few individual cases required special consideration. The persons brought together have included Health Visitors, Public Health Inspectors, Housing Managers, Local Authority Treasurers, Officers of the N.S.P.C.C., and National Assistance Board, Children's Officer, School Welfare Officers, Welfare Department, Probation Officers, etc.

SCHOOL HEALTH SERVICE.

School children in this Division receive periodic medical examination on school entry, during last year at primary school and prior to leaving secondary school.

These examinations, however, are spread out over the school year in such a way that a Medical Officer will visit each school at least once each term, so there is ample opportunity for discussion of special cases with teaching staff, and of course, many examinations of school children are carried out apart from those seen at the periodic examinations.

It will be noticed that no eye conditions are recorded in the table of defects, but this is because each child's vision is tested every year by the nursing staff and in fact 50 children were referred to the Consultant Ophthalmologist for the first time through this channel.

Considerable progress was also made in the routine tests for hearing, particularly in the 6/7 year olds, and, as a result of this, 45 children were referred to the Consultant Ear, Nose and Throat Surgeon for further investigation.

We have been without the services of a Speech Therapist since 1963 owing to failure to recruit qualified staff. This is a serious deficiency in our school health service.

The Child Guidance Clinic which is held in Mirfield on two days per week accepts cases from our own and neighbouring Divisions. It is overloaded, there is a considerable waiting period before any but the most urgent cases can be dealt with, and there is a need to expand this service. However, the Clinic does excellent work and gives the best of co-operation under difficulties.

Tuberculin Jelly testing of 7/8 year old children was abandoned as being unnecessary, and for the older children the Heaf Test was replaced by the Mantoux Test. I had felt for some time that the Heaf Test was not sufficiently precise and gave a falsely high percentage of positive reactors. I feel that this has been confirmed and this year the number of positive reactors is shown as 5% compared with 25% last year. It seems certain that results previously recorded as Heaf Positive Grade I and II are negative to the Mantoux Test using Old Tuberculin 1 in 1,000.

Over 2,000 examinations were carried out by school nurses for the detection of infestation of children's hair, and although the incidence of this (3%) is fairly light it ought to be quite unnecessary. With modern medicated shampoos and the use of a proper comb there should be no difficulty at all in preventing infestation if parents will only insist on their children having a regular weekly hair toilet, and it is surely their responsibility and not that of the school nurses to ensure that it is done.

A survey of the footwear and foot conditions in school children was carried out during the year among 677 school children in the Divisional area with ages ranging from 4 to 15 years, and details of this are given in the following Section. The survey was carried out by Mr. B. D. Vaines, chiropodist, assisted by the clerical staff of the Health Department, and I am pleased to acknowledge with gratitude the co-operation shown by the headteachers and staff of the schools who took part in the survey.

SPECIAL EXAMINATIONS.

In accordance with the requirements of the Education Act, 1944, a number of children have been referred by the Education Authority which has necessitated the arrangement of special examinations. During the year 29 children were examined involving 31 examinations altogether. The following recommendations for special education were made:—

Education in a Day School for Educationally Subnormal Pupils	1 1 2 2 1 3 5
Reported to Local Authority for the purposes of the Mental Health Act— Section 57(4) as amended(unsuitable for education at school For Care and Guidance after leaving school	l) l Nil
During the year the following admissions to special schools made:— Residential School for Educationally Subnormal Pupils Day School for Educationally Subnormal Pupils School for the Blind	2 1 1
During the year the following discharges from special schools made:—	s were
Open Air School for Delicate Children Day School for Educationally Subnormal Pupils Residential School for Educationally Subnormal Pupils School for Maladjusted Children	2 1 1 1

The following table shows the number of children from Mirfield receiving, and those awaiting, education in special schools at 31st December, 1966:—

Type of School	No. of children receiving special education	No. of children awaiting special education

CLEANLINESS INSPECTIONS.

Two routine inspections were carried out at each school by the school nurses and a total of 2,712 inspections and re-inspections were carried out. In 76 instances infestation was detected and this involved 59 individual children, the condition of some of the children being unsatisfactory on more than one occasion. It should be pointed out that in the majority of cases the degree of infestation is extremely light.

The remedial procedure on the discovery of these defects is to notify the parents informally in the first instance, visiting if necessary to give advice on the methods of dealing with infestation. If cure is not effected the nurse visits the home and interviews the parents, and finally, if it is evident that insufficient care is being exercised, the Statutory Notice under the Education Act, 1944, is sent requiring the child to be cleansed to the satisfaction of the Medical Officer or to the person appointed by him for that purpose within 48 hours. No Statutory Notices were issued during the year.

The section of the report which follows, relating to the Sanitary Circumstances of the area and the work of the Public Health Inspectors, has been compiled by Mr. H. H. Johnson, Chief Public Health Inspector.

SANITARY CIRCUMSTANCES OF THE AREA.

During the year 2 accidents were notified, details of which were forwarded to H.M. Factory Inspector.

The Act is causing a considerable amount of extra work, and it may be necessary to provide extra staff to cope with same.

CLEAN AIR ACT, 1956.

During the year a number of Smoke Observations were made of industrial premises in the area. It was found necessary to draw the attention of 4 factories to infringements of the Dark Smoke (Permitted Periods) Regulations, 1958.

SMOKE CONTROL AREAS.

The Mirfield No. 7 Smoke Control Order came into operation on the 1st October, 1966, all the necessary works of adaptation and replacement to the fireplaces in the area having been completed before the operative date. The area comprises 56.6 acres of land between Greenside Road and Lee Green to join the Nos. 4 and 5 Areas at Old Bank Road; and from Lee Green to the Zion Baptist Chapel to join No. 3 Area, West Royd, and No. 1 Area at Water Royd Lane. The Area comprises the following classes and numbers of buildings:—

Ι.	Dwellinghouses:	
	(a) Drive toly orread (by	

(b) Pr (c) Co	rivately or rivately or ouncil ow; ouncil ow;	wnee ned	d (built (built l	after l before	6th Au 16th A	g., 196 ug., 19	(5)	$165 \\ 7 \\ 127 \\ 16$
Commerc	ial premi	ses					•••	$ \begin{array}{r} 315 \\ 21 \\ 3 \end{array} $
Other pro			•••	•••	•••	•••	•••	342

With the No. 7 Area 531.88 acres of the district had been covered by Smoke Control Orders involving 1,468 dwellinghouses.

As this was the first Area where the North Eastern Gas Board had been unable to guarantee additional supplies of open fire fuels, some slight difficulties in distribution arose when the Order came into operation. This was in spite of the fact that other suppliers had stated that they would be able to fulfil the requirements in respect of these fuels.

During the year the No. 8 Smoke Control Area was surveyed, following which similar replies were received from the suppliers. Accordingly, when the area was submitted to the Council on 25th November, 1966, open fires were not specially designated.

After approval by the Council the Mirfield No. 8 (Towngate) Smoke Control Order was submitted to the Ministry of Housing and Local Government on 22nd December, 1966.

The Area comprises 91.03 acres of land from Pratt Lane (adjoining the No. 2 Westfields Area) and Lee Green (adjoining the No. 7 Lee Green Area) then following Dunbottle Lane to the Railway. The Railway is the boundary of the Area to Knowl Road, which it then follows to join the No. 2 Area and Water Royd Lane at the Baptist Chapel and the No. 7 Area.

The area comprises the following classes and numbers of buildings:

1. Dwellinghouses:

	(a) (b)	Privately Privately							187 92
									279
		iercial prer				• • •		• • •	8

									205
									295

The atmospheric pollution station at Knowl House was maintained during the year. The records show that no serious increase in pollution is taking place in the area and the deposits follow a similar pattern as is observed nationally.

The readings of the station are set out in the following table:—

	MgSO3/Day/ 100 sq. cm.	Rainfall ins.	Total Solids Tons/sq. M.
January February March April May June July August September October	$egin{array}{c} 1.77 \\ 1.85 \\ 1.36 \\ 1.58 \\ 0.32 \\ 0.77 \\ 0.87 \\ 0.80 \\ 0.99 \\ 1.27 \\ 1.18 \\ \end{array}$	$egin{array}{c} 1.58 \\ 5.08 \\ 1.26 \\ 4.33 \\ 2.25 \\ 2.29 \\ 2.44 \\ 5.08 \\ 1.42 \\ 3.62 \\ 3.03 \\ \end{array}$	10.37 19.95 14.35 18.63 15.31 12.05 29.77 9.68 10.01 15.37 13.43

Average 1955-66	1.29	2.26	14.68

PREMISES AND OCCUPATIONS WHICH CAN BE CONTROLLED BY BYELAWS AND REGULATIONS.

All premises and occupations within the district which can be controlled by byelaws are already so controlled. There are no Common lodging-houses or underground sleeping rooms in the district.

CARAVAN SITES AND CONTROL OF DEVELOPMENT ACT, 1960.

The above Act came into operation on the 29th August, 1960. The Act confers on Local Authorities effective powers for controlling caravan sites. Planning permission is first required, and in granting permission consideration will be given as to whether it is possible for the proposed site to be made suitable for caravan use. The second stage is to issue the site licences, when conditions regulating the use of the site are set out by the Local Authority having regard to the Model Standards prescribed by the Ministry.

Two sites are now licensed for the stationing of four caravans.

WATER.

The district receives the bulk of its supplies from Huddersfield Corporation. The supply is constant and direct to the houses, and the whole district is on a piped supply.

It is regretted that the supply has again in certain areas in the district been most unsatisfactory. Strong complaints have been made to the Huddersfield Corporation and the matter is still receiving close attention.

PLUMBO-SOLVENCY OF WATER SUPPLIES.

Two samples of water from the Huddersfield Corporation mains were submitted for examination. Details are as follows:—

				RESUL EXAMIN	
SUPPLY	Date sample collected	Address at which collected	Approx. length of lead service pipe	Lead content (grains per gallon)	p H value
Huddersfield Corporation After standing in pipe all night	25.4.66 $11.10.66$	Council Offices Mirfield	25' 25'	Nil Nil	$6 \cdot 9$ $6 \cdot 5$
After standing in pipe for measured period of ½-hour	25.4.66 $11.10.66$	do. do.	25' 25'	Nil Nil	6 · 9 6 · 7

Fluoride Content of Water Supplies

Water Undertaker	Supply	Natural Fluoride Content	Number of Dwellings in District	Number of Dwellings Supplied
Huddersfield Corporation	Mains	0.1 ppm	5333	5333

DRAINAGE AND SEWERAGE.

Except in isolated cases the district is provided with sewers.

RIVERS AND STREAMS.

The River Calder runs through Mirfield and is in a polluted state when it enters the district. Considerable improvement has been made in the disposal of trade effluent from the majority of factories in the area which now enters the sewer, and as a result is improving the condition of the Calder.

HOUSING.

During the year 235 private houses were completed by private enterprise, a decrease of only 2 over the previous year; and the 16 Council Flats at Old Bank Road were completed early in the year.

Five houses were represented as unfit for habitation during the year. Rehousing of the Lower Hopton Clearance Area was completed early in the year.

RENT ACT, 1957.

The number of applications for Certificates of Disrepair under the Act has virtually ceased. The spate of applications received when the Act became operative was due to the fact that rents were increased and tenants took advantage of the Act to apply for Certificates, and I feel that the public are not fully aware that they may apply for Certificates of Disrepair at any time, and not necessarily at the time the rent is first increased. 34 Certificates have been granted since the Act came into force and only 3 of these have been revoked.

The following table shows details of applications received in 1966.

Part I. Applications for Certificates of Disrepair, 1966.

Part II. Applications for Cancellation of Certificates.			Nil

HOUSE PURCHASE AND HOUSING ACT, 1959. IMPROVEMENT GRANTS.

This Act came into force during 1959, making available Standard Grants under which house owners can obtain, as a right, half the cost up to a maximum of £155, of installing five basic amenities; the existing Discretionary Grant remaining for more extensive improvement. During the year 31 applications for Standard Grants were approved, amounting to £4,446 5s. 1d., as against 59 grants amounting to £4,384 12s. 5d. in 1965; and 3 applications for Discretionary Grants were approved amounting to £780 as against 6 grants amounting to £1,445 the previous year. The work involved has thrown additional strain on the Department, but is felt to be well worthwhile.

The following table shows details of applications for Standard and

Discretionary Grants.

HOUSING ACT, 1964.

The Housing Act, 1964, came into operation in August, 1964. The Act made certain alterations to the amounts of grant to be paid for the improvement of dwellings. The main purpose of the Act, however, was to enable Local Authorities to enforce the improvement of tenanted properties. The Council decided not to make formal Improvement Areas at the present time, but to deal with the matter informally.

OVERCROWDING.

No cases of Statutory Overcrowding are known to exist; there are, however, a number of cases of moral overcrowding assessed on bedroom standards.

INSPECTION AND SUPERVISION OF FOOD.

Milk Supply.

Regular inspections have been made at all dairy premises in the district and the provisions of the Milk and Dairies (General) Regulations, 1959, as applicable to dairies and distributors have been enforced.

FOOD HYGIENE.

I am pleased to report that in general the handling and wrapping of food in the district has been satisfactory.

Follow-up work in connection with the Food Hygiene Regulations, 1960, has been continued and the response from the Food Traders in the district has been good. In general the equipment and construction of the food premises in the area is good, but so much depends on the personal cleanliness of the food handler himself, and regular visitation of all premises is essential in order to educate and advise the individual on this important aspect of Food Hygiene.

The following table shows the progress which has been made during the year at the various food premises. It will be seen that with 7 premises either closed or changed in trade and with the addition of 3 new premises the total is 131 as compared with 135 the previous year. Of the outstanding notices only 2 are in respect of separate hand washing facilities.

REGISTRATION OF FOOD PREMISES.

(a) Ice Cream.

Forty-one premises are registered for the sale of ice-cream (prepacked).

Two premises are registered for the sale and manufacture of ice cream (Cold Mix).

Visits have been made to all registered premises during the year. Two premises only manufacture ice cream and both are manufacturing the complete Cold Mix and comply with the requirements of the Ice Cream (Heat Treatment Regulations) 1947.

(b) Register of Food (Preparation and Manufacture) Premises.

Nine premises are registered for the preparation or manufacture of food products. Ten are registered for the preservation of fish by cooking.

All the premises now comply with the requirements of the Food & Drugs Act and have been well maintained during the year.

BAKEHOUS ES.

Regular inspections have been made at the seven bakehouses in the area. Throughout the year the general standard of cleanliness has been satisfactory.

SLAUGHTERHOUSES.

There is one licensed slaughterhouse only in the district. The Public Abattoir at Spenborough is available to any traders wishing to carry out their own slaughtering.

During the year regular post mortem inspections of all animals slaughtered at the Bacon Factory were carried out. Details of inspections and condemnations are as follows:—

No. of		CONDEMN	ATIONS

POULTRY INSPECTION.

There are no poultry processing premises within the district.

THE LIQUID EGG (PASTEURISATION) REGULATIONS, 1963.

There are no egg pasteurisation plants in the district.

CONDEMNATIONS OF UNSOUND FOOD.

The following items were surrendered and condemned as unfit for human consumption during the year:—

140 lbs. Canned Pork Tenderloin

97 lbs. Canned Cooked Ham

63¹/₄ lbs. Canned Corned Beef

 $23\frac{3}{4}$ lbs. Canned Chopped Pork

8 lbs. Canned Jellied Veal

8 lbs. Canned Pressed Ham

7 lbs. Canned Pork Loin

7 lbs. Canned Irish Stew

6 lbs. Canned Pork Luncheon Meat

6 lbs. Canned Stewed Steak

 $3\frac{1}{2}$ lbs. Canned Chicken

3 lbs. Canned Ox Tongue

1½ lbs. Canned "Ready Dinner"

 $1\frac{1}{2}$ lbs. Canned Steak and Kidney Pudding

1½ lbs. Canned Pork and Ham

1 lb. Canned Braised Steak

1 lb. Canned Steak and Vegetables

 $\frac{3}{4}$ lb. Canned Chopped Ham

½ lb. Canned "London Grill"

 $\frac{1}{2}$ lb. Canned Spam

lb. Canned Savoury Minced Steak

1/4 lb. Jar Chicken Fillets in Jelly

 $13\frac{3}{4}$ lbs. Canned Tomatoes

 $7\frac{3}{4}$ lbs. Canned Baked Beans

 $6\frac{1}{2}$ lbs. Canned Green Beans

6½ lbs. Canned Processed Peas

4½ lbs. Canned Creamed Rice

3 lbs. Canned Cream of Mushroom Soup

 $2\frac{3}{4}$ lbs. Canned Lemon Pie Filling

 $2\frac{1}{2}$ lbs. Canned Vegetable Soup

eq. ½ pt. Full Cream Evaporated Milk

2 lbs. Canned Treacle Sponge

1½ lbs. Canned Mixed Vegetables

1½ lbs. Canned Cream of Tomato Soup

1 lb. Canned Creamed Sago

1 lb. Canned Creamed Tapioca

 $\frac{3}{4}$ lb. Canned Carrots

³/₄ lb. Canned Garden Peas

1 lb. Canned Kidney Soup

3 lb. Canned Noodle Shells in Tomato Sauce

½ lb. Canned Salmon

 $\frac{1}{2}$ lb. Canned Butter Beans

1/2 lb. Canned Baked Beans and Sausages

1/4 lb. Canned Prawns

 $9\frac{1}{9}$ lbs. Canned Pears

 $7\frac{1}{2}$ lbs. Canned Grapefruit Segments

 $7\frac{1}{4}$ lbs. Canned Peaches

6 lbs. Canned Apples

5¾ lbs. Canned Fruit Salad

- $3\frac{1}{2}$ lbs. Canned Pineapple Slices
- $2\frac{3}{4}$ lbs. Canned Strawberries
- 2 lbs. Canned Oranges
- 2 lbs. Canned Apricots
- 2 lbs. Jar Bilberries in Syrup
- 1½ lbs. Canned Victoria Plums
- 1 lb. Canned Fruit Cocktail
- 3/4 lb. Canned Raspberries
- $\frac{1}{2}$ lb. Canned Prunes
- $\frac{1}{4}$ lb. Canned Cream
- 19 fl. ozs. Canned Pineapple Juice
 - 4 fl. ozs. Canned Orange Juice

RODENT CONTROL.

PREVENTION OF DAMAGE BY PESTS ACT 1949.

During the year treatments for the eradication of rats and mice were carried out at 64 private premises and 12 business premises. The number of visits required to carry out these treatments was 219 and 62 respectively.

The Prevention of Damage by Pests Act, 1949, places an obligation on the Local Authority to ensure that as far is as practicable its area is kept free from rats and mice. District Councils are directly responsible for the administration of the Act. The Act provides for the submission of reports to the Ministry. Under the authority of Section 4 of the Local Government Act, 1958, the rodent control grants payable under the Prevention of Damage by Pests Act, 1949, ceased to be made after 31st March, 1959, so that the whole of the expense of Rodent Control is now rate borne.

The Minister expresses the hope that local authorities will continue their efforts in the work of rodent control, and this is being achieved in this district. Regular surveys are made and prompt attention is given to any reports of rat or mice infestations. A free service is given to private dwellings and a charge is made at Industrial and Commercial premises.

The work of rodent control is carried out by Mr. G. O. Lee, Assistant Public Health Inspector, and Mr. F. F. W. Popplewell, and I have to thank them for the most efficient manner in which they have carried out their duties in this vital work.

The following table gives details of inspections and treatments:—

	T	YPE OF P	ROPERTY	· · · · · · · · · · · · · · · · · · ·	
		Non-Agric	cultural		-

SCAVENGING.

The Scavenging of the District during the year has been satisfactory. A weekly collection of refuse is maintained with the exception of holiday periods. The Department has a fleet of modern Refuse Collecting Vehicles, and the district has a Refuse Collection Service which will bear favourable comparison with that of any similar district.

Some difficulty is being experienced in maintaining a full staff for this work and with the rapid increase of domestic properties in the area it will be necessary in the near future to engage extra staff for this work.

Details of the work carried out by the Department during the year are set out below:—

Wagon No.	Loads to tip	Bins	Privies	Ashpits	Pail Closets	Trade Refuse

SALVAGE 1966-1967.

The results of the salvage effort during the year are set out below. The income amounting to $£1030\ 10s$. 3d. is again very gratifying.

I thank all those householders and business houses who have throughout the year regularly saved their waste paper. This material is now practically the only article salvaged. We rely on a substantial income from Salvage to assist in the economic running of the Cleansing Department.
